

Message from Turkey Lane

2023 has been a very challenging year managing a footrot infection, we started our eradication program in early March after a delayed shearing. Luckily when we first detected footrot we quarantined all mobs to avoid cross contamination. Doing so we limited the infection to only two mobs which were rams and lambs (1400 sheep). We spend two weeks foot trimming and grinding all sheep on the property and another two weeks with a five day footbath. Up until a successful clearance inspection in September we have limited all movements of sheep on the property. Our footrot clearance inspection saw no signs of scald or any other forms of footrot.

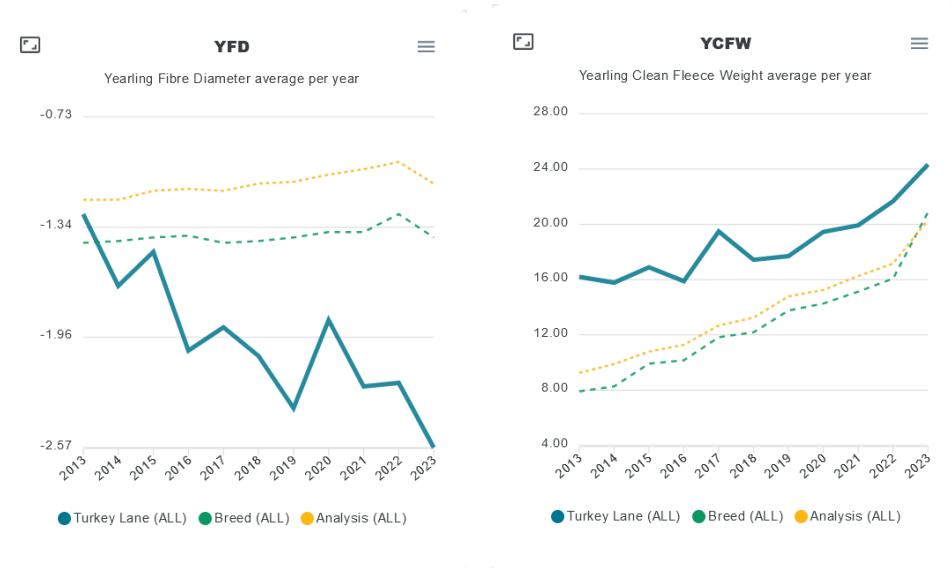

Moving forward we intend to sterilisation footbath (15 minutes) after crutching, shearing and ram sale as part of our enhanced biosecurity plan. We never want to go through the trauma of notifying clients we have potentially passed on footrot as our aim is to be open and transparent.

We are still pursuing the breeding objective of lowering micron and increasing wool cut but not at the expense of wrinkle, worm resistance and quality of wool. Our biggest challenge is finding outside genetics to meet these objectives. We can easily find sires that are either heavy cutting (+30CFW) or negative micron (-3FD) but not on the same animal.

Disease Status

Turkey Lane flock has MN1V status for OJD in the National program, brucellosis Accreditation (1354), no lice has ever been detected in the flock and no forms of scald or footrot in the flock as per inspection in September 2023 (inspected again 20th October 2023).

The graphs below illustrate how Turkey Lane compares to the Merino Industry. We are committed to continue pushing in this direction.

The graphs on the front page supplied by MerinoSelect validates the continued improvement in our flock compared to the average merino ram breeder in Australia. This should allow you to bid with confidence knowing you are buying from a genetic source that is outperforming the merino industry.

Measurement Dates

- Rams born mid July – mid September 2022
- Shorn 3rd April 2023
- Fat and eye muscle depths 28th April 2023
- Individual Worm Egg Count (WEC) 16th June 2023
- Wool pin bone samples 31st March & 3rd October 2023
- Ram Physicals by veterinarian 20th October 2023
- Yearling body weigh 11th October 2023
